

100% DIGITAL DIAGNOSIS WITH THE NEW IPAD WALL

100% DIGITAL DIAGNOSIS + DIGITAL EYE CATCHER

Simplify providing a digital colour diagnosis to your client by using the IPAD wall.

Place this display on a central location within the salon so that every employee will be able to use an iPad at any time. The WALL allows stylists to detach an IPAD in order to sit freely with a customer and provide her with a personalized consultation.

For providing a colour diagnosis, you can use various apps such as Style My Hair PRO or social media applications.

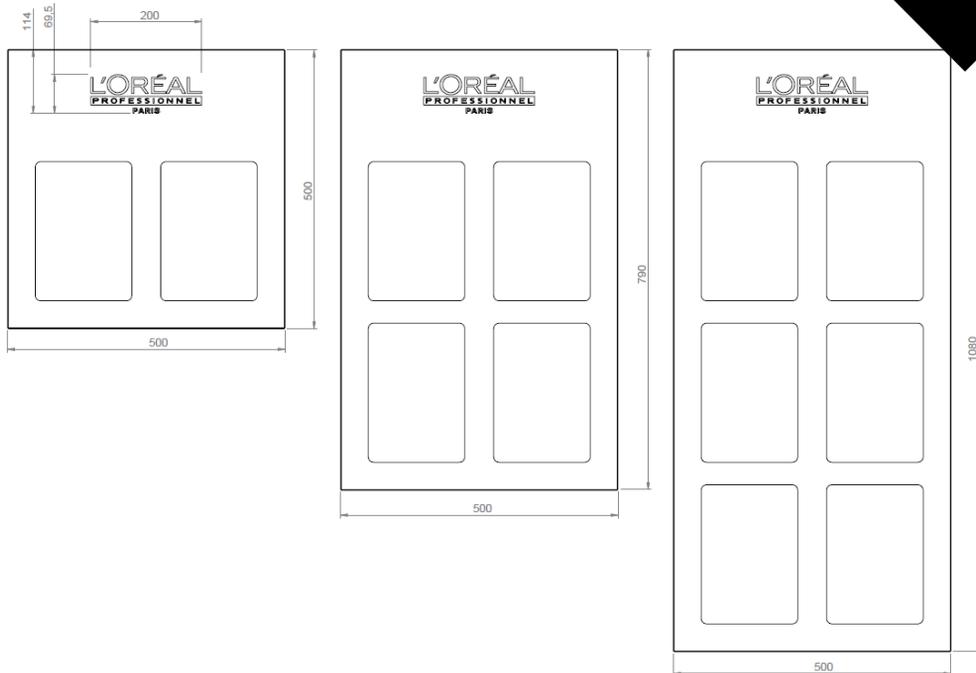

The IPAD wall is available in 3 sizes with 2, 4 or 6 IPADS*

The IPADS are charged by a cable and charger which are incorporated into the IPAD wall.

- ❖ Prices do not include transportation or installation costs
- ❖ IPADS are not included and need to be purchased by the salon owner in lights of product warranties.
- ❖ Salon owners can decide to use a different type of tablet brand. Charging cables will need to be replaced subsequently.

ASSEMBLY & MAINTENANCE

Assembly on the wall

The IPAD display needs to be attached to a solid wall in the salon. It will be firmly fixed onto a rail at the top. At the bottom, the display will be invisibly secured to the wall.

- ❖ The salon needs to select a flat and solid surface that can carry the weight of the display whilst promoting easy access for stylists. Please do avoid positioning the display next to a door to avoid theft.

Electrical connection

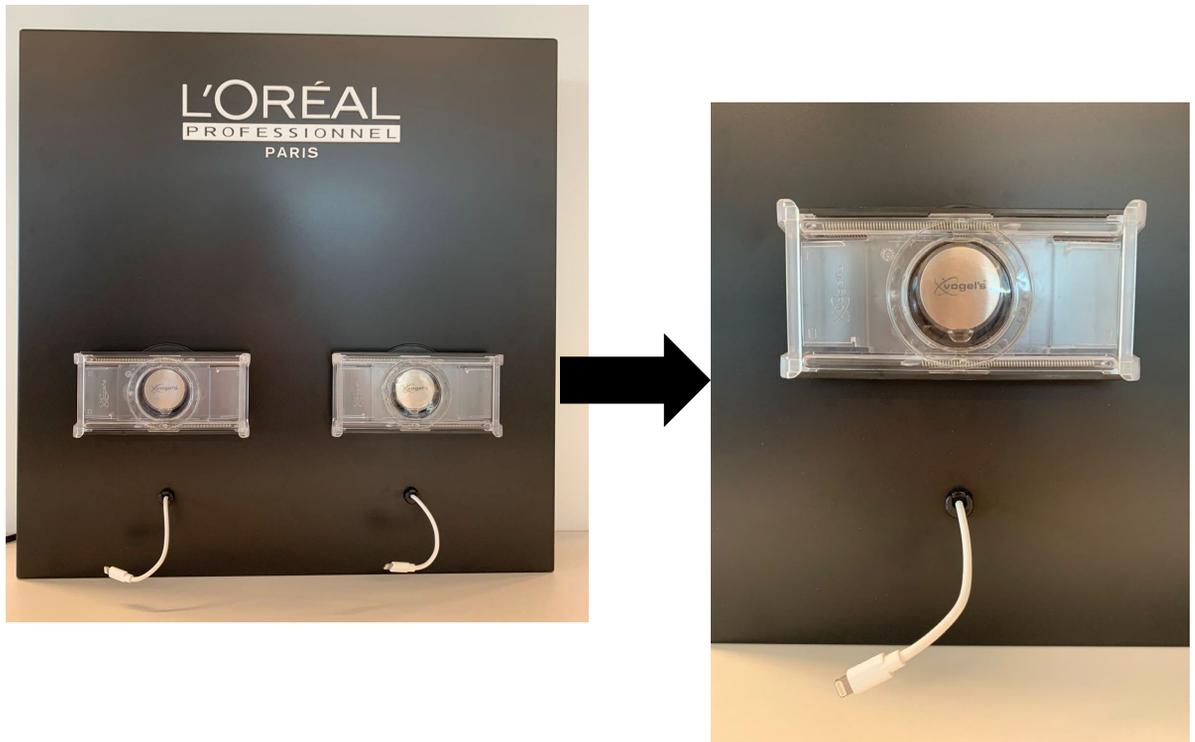

The IPAD wall needs to be connected to a power outlet. This power outlet can be located behind the display or with the use of an extension cord to the nearest power outlet.

- ❖ The salon is responsible for providing a well-functioning power outlet

Maintenance

The IPAD wall does not demand any special maintenance. Only a regular clean with a slightly damp cloth and mild detergent.

- ❖ Cables and chargers are subject to wear and tear. Therefore, pay attention to the correct use of these cables and chargers. The replacement of either is the responsibility of the salon and should only be carried out by certified electricians.

HOW TO USE IT?

Installation of IPADS

Each IPAD will be individually clasped in a sturdy holder. Next, the charging cable should be connected so that the IPAD can be charged. The IPAD holders make it possible to center the IPADS within certain margins and to align them by hand if needed.

Removal of IPADS

First, disconnect the charging cable from the IPAD. Then, the IPAD can be removed from the holder by sliding it sideways.

TIPS

- ❖ Collect your favorite photos and start a slide show from the album on the IPAD when not in use. By doing this, you will make optimum use of the IPADS and it will surely attract the attention of customers.
